Android

ASP.NET MVC

MSSQL

PHP

Java

Office Information Technology

INTERESTS

Learning new things

Music

Game

Read book, novel

Available functions:
 +Index page, Product menu page, Cart, Login/Register page, Order page, Admin page, Product management page
 + Sort menu, login/register function, add to cart, Delete cart, check out
 +Dashboard, add/delete/edit product

Library Management (Self project)
 Technology used: .NET Framework, WinForms, C#, SQL
 Available functions:
 +Search, sort books/users, login function, change application's background
 +Manage function for books, type of books, books borrow/return, users (add/edit/delete)
 +Print revenue, borrow/return slips, users list

Design and build website to sell kitchen tools (Self project):
 Technology used: +Frontend: HTML, CSS, JS, Bootstrap
                               +Backend: SQL, PHP
 Available functions:
 +Index page, Product menu page, Cart, Login/Register page, Order page, Admin page, Product management page
 + Search, sort products, relate products, wishlist, comments,   login/register function, add to cart, Delete cart, check out
 +Dashboard, add/delete/edit product

Develop an Android app to see cooking recipes (Self project)
 Technology used: Android, JAVA, SQLITE
 Available functions:
 +Login function, manage self account, log out or exit, search, see recipe.
 +Manage function for product for admin(add/edit/delete)
