Describe:
Project has 2 pages
   1. User page
      a. Users without login can view: services, doctors, news, and can book consultations.
      b. Users who log in will have the function of booking an appointment and can view medical records, date of examination, and medical history.
   2. Admin page
      The admin page will be divided into 3 levels:
      + Level 1: Super Admin
               Being the highest level with all the rights of management and nurses
      + Level 2: Admin (manager)
               At the admin level, it will be for management: here the administrator will be able to add, delete, edit admin accounts, Super Admin, nursing or nurse accounts, add, delete, edit services, or doctors.
      + Level 3: Nursing/nurse
               At the nursing/nurse level, you will have the right to view the entire departments working schedule, add and delete information, manage medical records, manage and browse those who need consultation, manage patients who book appointments. examination
